SOME PROFESSIONAL ADVICE BY LOIC BISOLI:

His lens captured the most beautiful sites of la Côte d'Azur.

He is sharing with you his professional tips.

« The most important is to focus on the light:

- Either the light is soft and grazing in the morning or late in the evening before the dawn that we call the "Golden Hour", or a strong and contrasting light at midday more zenithal and which offers a graphic dimension to our images.
- Do not hesitate to meet the locals to make the picture alive.

Loïc Bisoli can guide you through this experience if you wish.
