

HOLD YOUR *Breath*

GET READY TO EMBARK FOR ILES DE LERINS TO DISCOVER THE 1ST UNDERWATER ECOMUSEUM.

By snorkeling between 3 and 5 meters deep, you will discover 6 giant sculptures.

Created by the talented Jason Decaires Taylor, well-known around the world, they are part of a virtuous project initiated by the Mayor of Cannes David Lisnard, a unique experience that raises awareness for the protection of marine biodiversity.

The little wink about this story is that these artworks are representing the face of 6 Cannes residents chosen randomly by the city.
